

SWITCHCRAFT TINI-QG MINIATURE XLR STYLE CONNECTORS

Commonly used with miniature microphones, these cable connectors are suitable for cables up to 3mm overall diameter. Female panel connectors have a rectangular bezel with two fixing screw holes, and require a 15.1mm panel hole when front mounted, 14.2mm when rear mounted. Male panel connectors have a round bezel, and require an 11.3mm panel hole with anti-rotation flat.

Note: These connectors mate with the Rean Tiny-XLR series
