CANFORD SCAFFOLDING, LIGHTING AND GAFFER MICROPHONE CLAMPS

Microphone Hook Clamp

This standard piece of stage lighting equipment may be used to fix microphone clips to lighting and scaffolding bars from 38-50mm diameter. Supplied complete with captive $\frac{3}{8}$ " bolt fitted through the lighting standard oversized hole. The screw kit is also available separately, for fixing to other stage lighting hardware or through any hole up to 12mm diameter.

Microphone Gaffer Grip

Gaffer grips are used as temporary fixings for TV lighting etc onto scaffolding, sets or other suitable edges. Essentially an oversized clothes peg with jaws for fixing to anything up to a thickness of 70mm, supplied with a TV lighting standard spigot and adapter to $\frac{3}{8}$ " thread. The thread adapter is also available separately for fixing to other TV lighting hardware.

Standard Hook Clamps and Gaffer Grips

Both items are also available in their "standard" form, without microphone thread fixings. Bolt and wing nut kits, for fixing lanterns, loudspeakers etc to hook clamps, are also available.
