MAGLITE FLASHLIGHTS

Maglite flashlights are the finest exponents of flashlight technology available today. These powerful, high performance torches are standard issue to U.S. police and fire officials, engineers, rescue and outdoor teams who rely on Maglites for their work and safety. Each Maglite is constructed from aircraft grade aluminium with a non-slip grip. A simple twist of the head varies the beam from wide flood to tight spot. Tough and waterproof, these torches are designed for a lifetime's use. Sealed to keep all internal parts dry and corrosion-free, each torch houses a spare bulb in its tailcap and is supported by a lifetime guarantee. A feature of the Mini-Maglite is that the lens head comes off, enabling the torch with its exposed bulb to act like a candle to provide general illumination in a dark area. This is particularly useful when both hands are needed for tools.

Solitaire

The "keychain" Maglite, the smallest in the range, this runs on one AAA size battery. Length 81mm, supplied with nylon key ring strap.

Mini-Maglite AA

Runs on two size AA batteries. Weight is only 60g, and its length is less than 150mm so fits easily in a pocket, toolkit or briefcase. Its superior optics provide more light than any other flashlight its size. Supplied complete with nylon wrist strap, pocket clip, coloured lenses and two batteries. A nylon belt holster is available as an accessory (stock code 51-731). Suitable batteries stock code 59-147 (pack of 4).

Standard Maglite

The international professional flashlight, available in three sizes using 2, 4 or 6 size D batteries. Measuring 250mm, 375 and 500mm long respectively, brightness increases with the number of batteries, but even the smallest produces a blinding beam of great intensity which is fully adjustable from spot to flood. Batteries are not included. Suitable batteries stock code 59-148.

Mag-Charger

The most powerful handheld flashlight of its size (approx 300mm long), rechargeable up to 1000 times. Supplied with battery pack and 12 volt cigar-lighter and 240 volt chargers.

Maglite is a trademark of Mag Instruments Inc. Manufactured in USA.
