

CANFORD LOW-COST LAVALIER MICROPHONES

A range of low cost lavalier microphones, particularly suitable for educational and industrial users. All are battery powered (no phantom powering facility), with 1000 ohm unbalanced output. They are suitable for use with most equipment designed for normal low impedance microphones.

EM100

Miniature lavalier microphone, 8mm diameter, 16mm length, black finish. Omnidirectional polar pattern for optimum speech pickup. Impedance 1000 ohms, frequency response 50-18000Hz, sensitivity -65dB/1kHz. Weight of mic head 6g. 6 metre cable, terminated with battery holder with 3.5mm 2 pole jack plug. Supplied complete with battery, type LR44. Spare batteries are available, stock code 59-140. Suitable windshield is Canford type C8, stock code 53-458.

EM110

As EM100, but with battery on/off switch to reduce power consumption. 1m cable from mic head to battery holder (in-line type), 5m cable from battery holder to 3.5mm 2 pole right-angle jack plug.

Both the above models are supplied complete with foam windshield, tie clip holder, battery and plastic storage box. Manufactured in Taiwan.

TCM141

Miniature lavalier microphone, 8mm diameter, 16mm length, black finish. Omnidirectional polar pattern for optimum speech pickup. Impedance 1000 ohms, frequency response 30-18000Hz, sensitivity -65dB/1kHz. Weight of mic head, 6g. With battery on/off switch to reduce power consumption. 1m cable from mic head to battery holder (in-line type), 0.7m cable from battery holder to 3.5mm 2-pole right-angle jack plug. Supplied complete with battery (type LR44), foam windshield, tie clip holder and adapter to 2-pole 6.35mm jack plug. Spare batteries are available, stock code 59-140. Suitable spare windshield is Canford type C8, stock code 53-458. Manufactured in Taiwan.
