

EXTRUDED BOX COLOURED BEZELS

Offered in a rainbow of colours, these replacement mouldings can be used to customise any item of equipment built in the standard Canford Type 85 extruded box. Use them for colour-coding different types of Tecpro beltpack for example, or simply to brighten up the utilitarian standard-issue black!

The four screws retaining the existing bezel are removed, taking care to avoid stressing the components attached to the end-plate, the bezel replaced with one of the chosen colour, and the screws replaced. A fresh new look in a couple of minutes! Use a different hue at each end for that really unique look! Black version also available, for use as spares or for the seriously sombre. For suitable fitting-tool see Index: Screwdrivers, Pozidrive. Screws suit 1-point size screwdrivers.

16-090 EXTRUDED BOX BEZEL Black

16-092 EXTRUDED BOX BEZEL Red

16-093 EXTRUDED BOX BEZEL Orange
