

XLR - 3-POLE, 3.5MM JACK Y-LEADS

Prewired cables, ready for use. Wired unbalanced stereo at the 3.5mm 3-pole moulded jack. Moulded "Y" split in cable. Coloured glands identify Red for A leg or left leg and Green for B leg or right leg.

Each individual cable is described in detail by the use of an abbreviated sequence in the form:

Canford Cable - 1st connector - 2nd connector - cable length - cable colour.

Detailed specifications for the connectors and cables are given in their appropriate entries elsewhere (except pre-moulded cables and connectors). All XLR connectors are solder connection type, not IDC. Abbreviations used in the descriptions are as follows:-

3FXX -XLR 3-pin female connector 41-031

3MXX -XLR 3-pin male connector 41-032

3MJP3.5 -3.5mm miniature 3 pole jack plug pre-moulded to dual pre-moulded "y-split" cable
