## 42-681 Midi Mains Switcher

## Introduction

The Midi Mains Switcher is a free standing unit that allows any mains-powered equipment such as signal lights, pyrotechnics, etc to be switched under midi control. Multiple units allow the user to control power up and power down conditions in sequence. Mains switching occurs at the zero-crossing point of the mains cycle, which together with spike suppression components, ensures that interference is virtually eliminated. Mains input and output connectors are IEC 3 pole with a 20 mm fuse on the input line. The control input uses a standard 5 pin din female Midi connector. Configuration of the unit is via 16 DIL switches with provision to override the operating mode via Midi Program Change commands and omni on/off status via Midi Channel Mode commands.

Note: $\quad$ This preliminary version of the manual assumes familiarity with Midi messages, binary conventions and terms describing such.

## Front Panel Description

Omni LED: When illuminated indicates that the unit is set to Omni On receive mode, i.e. will be controlled by Midi commands on any of the 16 Midi channels. Omni Off status (LED extinguished), unit will only respond to Midi commands on the Midi channel as set by the user utilising the 'Channel' DIL switches.

Mode LED:
Gives a visual indication of which operating mode has been selected as preset by the user using the front panel 'Mode' DIL switches or via remote Midi Program Change commands. Eight operating modes are available, the LED flashes to indicate which mode is currently active, i.e. one flash $=$ mode one, two flashes $=$ mode two, etc.

## Configuration Switches:

## CONFIGURATION

## Reset Swt:

Mode Swt:
Three DIL switches that select one of the following operation modes:

|  | MAINS ON | MAINS OFF | COMMENT |
| :---: | :---: | :---: | :---: |
| Mode 1 <br> Note On $\sim$ Note Off | Midi Note On | Midi Note Off | Note as defined by Note/Value <br> DIL switches |
| Mode 2 <br> Note On Toggle | Midi Note On | Next <br> Midi Note On | Note as defined by Note/Value <br> DIL switches |
| Mode 3 <br> Note Velocity | Midi Note <br> Velocity $>63$ | Midi Note <br> Velocity $<63$ | Note as defined by Note/Value <br> DIL switches |
| Mode 4 <br> Note Next Adjacent <br> Colour | Midi Note On | Next Adjacent <br> Note On same <br> colour | Note as defined by Note/Value <br> DIL switches <br> See Appendix C |
| Mode 5 <br> Midi Controller | Midi Control <br> Value >95 | Midi Control <br> Value $<32$ | Controller as defined by <br> Note/Value DIL switches |
| Mode 6 <br> Note +1 | Midi Note On | Note On +1 <br> Note Value | Note as defined by Note/Value <br> DIL switches <br> See Appendix C |
| Mode 7 <br> Note +2 | Midi Note On | Note On + <br> Note Value | Note as defined by Note/Value <br> DIL switches <br> See Appendix C |
| Mode 8 <br> Bypass | $\sim \sim \sim \sim \sim \sim \sim$ | $\sim \sim \sim \sim \sim \sim \sim$ | No response to Midi, thru port <br> still active |

See Appendix B for DIL switch settings to select operating modes.

Note: Front panel setting can be overridden by sending a Midi Program change command from your Midi controller. Mode number corresponds to the program change command that will select.

Channel Swt: Four DIL switches to select one of the sixteen available Midi channels. See Appendix B for switch settings.

Note: Front panel setting can be disabled by sending a Channel Mode Message from your Midi controller (Control message 125 Omni On), or via the Omni DIL switch. Reception on selected Midi channel can be re-instated by sending Controller 124 Omni Off from a Midi Controller, de-selecting Omni mode via the Omni DIL (up position) or using the Reset DIL switch which will also re-instate currently selected mode.

Omni Swt: DIL switch to enable/disable Omni On reception mode.
See Appendix B for switch settings.

Note: Front panel setting can be overridden by sending a Channel Mode Message from your Midi controller, (Midi Control message 125 Omni On or Control 124 Omni Off).

Note/Value Swt: Seven DIL switches to select Midi Note or Midi Controller that will trigger a 'mains on' condition, See Appendix B for switch settings

See also Appendix Cor information relating to Special Conditions in relation to Note 0 (C-2) in Modes 1, 2 \& 3 also notes 126 (F\#8) \&127 (G8) in Modes 4, 6 \& 7.

Output On LED: Illuminates when a Midi message that satisfies the 'mains on' condition as preset by the user has been received and mains power is passed through the unit.

Midi In LED: Illuminates when any Midi data is received by the unit. Also illuminates when any of the front panel switches are altered to confirm change of status.

Power LED: Illuminates to indicate the switcher is on and power is available to pass through the unit.

Midi In Din: $\quad$| Standard 5 pin Female Din Midi socket to accept Midi data from your |
| :--- |
| Midi controller. |

Midi Thru Din: $\quad$ Standard 5 pin Female Din Midi socket to pass all Midi data presented to the Midi In socket onto other Midi Mains Switcher's and or other Midi equipment.

Note: All Midi data is passed through the Midi Mains Switcher even when in Bypass mode (Mode 8).

## Back Panel Description

IEC Mains Inlet: Standard IEC mains inlet connector providing power to the switcher as well supplying switched mains outlet.

IEC Mains Outlet: Standard IEC mains outlet connector providing power to connected mains equipment when switched via Midi.

## Midi Specification

The Midi Mains Switcher conforms to Midi Standard Version 1.0. See Appendix D Midi Implementation Chart to view supported Midi commands.

## Mode 1: $\quad$ Note On ~ Note Off

Example below Note Value Swt preset to Note C3 (Midi Note 60).

Also see Special Conditions Mode 1.

## Mode 2: $\quad$ Note On Toggle

Example below Note Value Swt preset to Note C3 (Midi Note 60).

Also see Special Conditions Mode 2.

## Mode 3: Note Velocity

Example below Note Value Swt preset to Note C3 (Midi Note 60).

Also see Special Conditions Mode 3.

## Mode 4: $\quad$ Note Next Adjacent Colour

Example 1 Note Value Swt preset to Note C3 (Midi Note 60).

Mains On

Mains Off

Example 2 Note Value Swt preset to Note D\#3 (Midi Note 63).

## Mode 4: $\quad$ Note Next Adjacent Colour <br> $\qquad$ .Continued

Example 3 Note Value Swt preset to Note E3 (Midi Note 64).

Mode 5: Midi Controller.
Example below Controller 1:- Modulation Wheel.

Note: Dead-band area between Controller Values $32 \sim 95$.

## Mode 6: $\quad$ Note +1

Example below Note Value Swt preset to Note C3 (Midi Note 60).

Also see Special Conditions Mode 6.

Mode 7: $\quad$ Note +2
Example below Note Value Swt preset to Note C3 (Midi Note 60).

Also see Special Conditions Mode 7.

## Special Conditions

## Note Zero: Mode 1, Mode 2 \& Mode 3.

Selecting Note 0 (C-2) on the Note/Value Swt. allows the Midi Mains switcher to ignore the first data byte of any received note command effectively giving the following results:-

| Mode 1: <br> Note On ~Off | Any Note On <br> Any Note Off | Mains On <br> Mains Off |
| :--- | :--- | :--- |
| Mode 2: <br> Note On Toggle | Any Note On | Next Note On (any Note) |$\quad$| Mains On |
| :--- |
| Mains Off |

## Note Wrap: Mode 4, Mode 6 \& Mode 7.

Midi has a note range from Note 0 (C-2) to Note 127 (G8). In operating modes that use the next note same colour, note +1 or note +2 selecting note 127 as your mains on condition would mean there wouldn't be a note value to switch the mains off. With respect to this a 'note wrap' has been implemented in these modes which produces the following:-

| Mode 4: <br> Note Adj. Colour | Note 126 (F\#8) <br> Note 1 (C\#-2) <br> Note 127 (G8) <br> Note 0 (C-2) | Mains On <br> Mains Off <br> Mains On <br> Mains Off |
| :---: | :---: | :---: |
| Mode 6: <br> Note +1 | Note 127 (G8) | Mains On |
|  | Note 0 (C-2) | Mains Off |
| Mode 7: <br> Note +2 | Note 126 (F\#8) | Mains On |
|  | Note 0 (C-2) | Mains Off |
|  | Note 127 (G8) | Mains On |
|  | Note 1 (C\#-2) | Mains Off |

## Summary of Midi Implementation for Opto Switcher

## Hardware:

Midi In
5 pin Din
Midi Thru
Local Reset
Mode (Program Change)
Channel Selection
Omni On/Off
Note/Value Selection

5 pin Din
1 DIL switch
3 DIL switches
4 DIL switches
1 DIL switch
7 DIL switches

Software:

| Function |  | Recognized | Remarks |
| :---: | :---: | :---: | :---: |
| Channel |  | 1-16 | Set by DIL switch |
| Mode | Default Messages | $\begin{aligned} & \text { Mode } 1 \& 3 \\ & \mathrm{O} \end{aligned}$ | Honours 1,2,3, 4 |
| Note Number |  | 0-127 | Set by DIL switch |
| Velocity | Note On Note Off | $\begin{aligned} & \mathrm{O} \\ & \mathrm{X} \end{aligned}$ | Mode 3 only |
| Touch |  | X |  |
| Pitch Bend |  | X |  |
| Control Change |  | 0-120 | Mode 5 only |
| Program Change |  | O | 1-8 |
| System Exclusive |  | X |  |
