Network Audio Interface

DARK8O

Portable 8 Channel Dante/AES67 Analogue Network Audio Interface

Highlights

Ideal For Broadcast, Theatre & Pro Audio

8 Analogue audio outputs

Dante & AES67 Compatible

Redundant Network Interface

Network Remote Control & Configuration

Redundant PoE Powering

The DARK8O provides 8 analogue outputs from a Dante/AES67 network using XLR connections. The network link is via primary and redundant copper Ethernet or SFP fibre modules. Power is on PoE or external DC.

The compact throw down box style makes the DARK8O very useful as a high quality utility output interface for your Dante or AES67 network.

AES67
